Time Management

Decision Making

Continuous Learning

## LANGUAGES

Tamil

English

## OBJECTIVE

As a fresh UI/UX designer and developer with an MCA degree, I am passionate about crafting impactful digital experiences. My skills in Figma, Adobe XD, and user experience concepts, combined with my enthusiasm for learning from seasoned professionals, drive my dedication to actively apply and enhance my abilities in UI/UX design and development.

## PROJECTS

### PG PROJECT | STORY HUB WEBSITE USING PHP | WEB APPLICATION

2024

This project turns voice recordings into text for storytellers, with categories for different stories. Writers submit recordings, which the system converts to text.

I used HTML, CSS, and JavaScript for the frontend, and PHP with an SQL database for the backend on this project.

Writers and Readers are the main modules in this system. This project includes various categories of articles. Writers can enter their article as voice recording.

### UG PROJECT | SMART IRRIGATION SYSTEM | IOT

2022

The smart irrigation system using IoT is a modern approach to crop watering that integrates sensors and internet connectivity. By continuously monitoring soil conditions and employing automated controls, the system ensures crops receive the right amount of water at the right time.

### UI/UX DESIGN PROJECT | VOXY - MUSIC APPLICATION DESIGN

2024

This music app aims to create an immersive experience by nurturing a global community of music enthusiasts who can sing, share, and enjoy music together, irrespective of language or location. It utilizes UX design concepts such as user-centered design, intuitive navigation, and interactive elements. Tools used include Figma for prototyping and Google Forms for the research process.

## CERTIFICATES

### UI/UX DESIGN | ONLINE BOOT CAMP BY DEMENTEE ACADEMY

### FIGMA TOOL | COURSE COMPLETION CERTIFICATE BY GUVI

### COMPUTER NETWORK & INTERNET PROTOCOL | COURSE COMPLETION CERTIFICATE BY NPTEL
